This is a highway concessionaire that operates the Anchieta - Imigrantes System, a connection between the metropolitan region of São Paulo State and the Port of Santos (the largest in Latin America). It also connects the Cubatão Petrochemical Complex, the ABCD and Baixada Santista industrial park. The concession is 176.8 km long and has annual traffic in excess of 30 million toll-paying vehicles, this highway is vital to the Brazilian economy, since it services the most important export corridor in all of Latin America, as well as the Baixada Santista tourist district.

ECOSUL manages the largest highway network in Brazil, known as the Pólo Rodoviário de Pelotas/RS, which includes 457.3 km of federal roadways. The concession joins five stretches that are vital to the regional and national economies, the largest being the so-called "Mercosul Corridor," (BR 116). Almost half of the 6.5 million vehicles that travel the highways managed by ECOSUL are cargo vehicles bound for the Port of Rio Grande. ECOSUL is also the most important route traveled by Argentine and Uruguayan tourists visiting the Brazilian coast.

Eco101 manages a 475.9 kilometer stretch of BR-101 in the state of Espírito Santo, passing through more than 20 municipalities, from the border with Rio de Janeiro to Bahia. The highway leads to five major ports: Vitória and Tubarão in the state capital, Açu (still under construction) in Rio de Janeiro, Ilhéus in Bahia and Barra do Riacho. It also provides access to the main beaches of Espírito Santo state, such as Guarapari and Vila Velha, which receive millions of tourists each year.

The most recent asset in the EcoRodovias Group. It manages the 13.2-km long stretch of the Presidente Costa e Silva Bridge which added to the access stretches totals 23.4 kilometers. The Bridge is the main access stretch between the cities of Rio de Janeiro and Niterói as well as with the interior of the state, particularly with the Rio de Janeiro Lake Region and the north coast of the state.

We are a Brazilian company, subsidiary of EcoRodovias Group, located in the heart of the port of Santos (the biggest port in Brazil), near the city business center, customs offices, and with direct access to roads and rail networks. On our 175,000 m2 facility, we offer differentiated services, creative solutions, international security standards and integrated logistics services port-to-door such as: port operations, DTA Hub Port, handling and warehousing of import/export cargo, transportation, and Special Customs Clearance for Exports (Redex).
